PROJECTS

Login & Registration Web Application

Login and Register form with user information saving in database

- Developed a responsive **Login and Registration Web Application** using **HTML, CSS, JavaScript, PHP, and MySQL**.
- Implemented secure user **registration, login, authentication, and form validation** functionality.
- Designed and integrated a **MySQL database** to store and manage user account information.
- Used **PHP for server-side processing** and database connectivity, with JavaScript for client-side validation and interactive functionality.
- Created a user-friendly interface with responsive HTML/CSS design and handled form inputs and authentication errors effectively.

Responsive Landing Page

- Designed and developed a **responsive landing page** using **HTML5 and CSS3**.
- Created a clean, modern, and user-friendly layout with structured sections, navigation, buttons, and content areas.
- Used **CSS styling, Flexbox, and responsive design techniques** to ensure compatibility across different screen sizes and devices.
- Focused on visual consistency, proper spacing, typography, and an engaging user interface.

Personal portfolio website

Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, education, and contact information. Implemented a clean user interface, responsive design, smooth navigation, and interactive elements to provide a user-friendly experience.
